Sec No- 12	Team No- 8	Project Title- Travel Package Booking Portal
-------------------	-------------------	---

1. Abstract

The *Travel Package Booking Portal* is a web-based application designed to simplify the process of discovering, booking, and managing travel packages through a single digital platform. The system enables users to browse available destinations, compare travel packages, view detailed itineraries, check pricing, and make secure online bookings. The portal also provides interactive maps, package recommendations, booking history, and real-time payment processing to enhance the overall user experience.

The application follows a modern client-server architecture where the frontend offers a responsive and user-friendly interface, while the backend manages business logic, user authentication, package management, and transaction processing. By integrating location-based services and online payment facilities, the platform aims to reduce the complexity of travel planning and improve accessibility for travelers.

The proposed system benefits both customers and travel agencies by automating package management, reservation handling, and payment tracking. It provides a scalable and efficient solution that enhances operational efficiency while delivering a seamless booking experience.

2. Team Details

Roll Number(s)	Name of the Student	Signature
2520080011	K. Samanth	
2520080006	G.V. Karthik Reddy	
2520090179	P. Sri Datta Sai Suraj	

3. Frameworks / Platforms / Software Used

- *React.js* – Frontend user interface development
- *Node.js* – Server-side runtime environment
- *Express.js* – Backend web application framework
- *MySQL* – Relational database management system
- *Mapbox* – Interactive maps and location services
- *Payment Gateway Integration* – Secure online payment processing
- *Visual Studio Code* – Development environment
- *Git & GitHub* – Version control and collaboration

This project demonstrates the practical implementation of full-stack web technologies in developing an efficient and user-friendly travel booking solution.
