The screenshot shows the VS Code editor with the file explorer on the left displaying the project structure: JWT, __pycache__, .venv, and main.py. The main.py file is open in the editor, showing the following code:

```
1 from fastapi import FastAPI, HTTPException, Depends
2 from fastapi.security import OAuth2PasswordBearer, OAuth2PasswordRequestForm
3 from jose import jwt
4
5 app = FastAPI()
6
7 SECRET_KEY = "my-secret-key"
8 ALGORITHM = "HS256"
9
10 oauth2_scheme = OAuth2PasswordBearer(tokenUrl="login")
11
12
13 @app.post("/login")
14 def login(form_data: OAuth2PasswordRequestForm = Depends()):
15
16     # Classroom example only
17     if form_data.username == "101" and form_data.password == "abc123":
18
19         payload = {
20             "sub": form_data.username,
21             "role": "student"
22         }
23
24         token = jwt.encode(
```

The screenshot shows the VS Code terminal with the following output:

```

The screenshot shows the continuation of the main.py file in the VS Code editor, with the following code:
